Remove Residual Magnetism

Cylindrical Type Demagnetizer

MagTECH ASSOCIATES
SINCE1996
Manufacturing Magnetic Product as per Clients Requirements

Application

Demagnetizer is designed to eliminate Residual Magnetism of work piece, which is generated due to manufacturing process like turning milling grinding operations and due to contact with magnet also. Sizes and models can vary as per requirement. Magnetism can be verified by the GAUSS METER.

This particular model is made for bigger size job like gears, shaft, press dies etc.

How to operate

a) Provide a suitable supply to demagnetizer.
b) It operates by Foot Switch and
The work piece is passing through tunnel.

How to check performance

a) Check residual magnetism of work piece by Residual Field meter (Gauss Meter).
BEFORE demagnetizing.
b) Demagnetize it as per above instructions.
c) Check residual magnetism of work piece by Residual Field meter
(Gauss Meter)AFTER demagnetizing.

Area of application

Tool Room and standard Room, Press Shop, Assembly line etc.

Advantages

Increases tool life. Increases productivity. Increases quality.

Available sizes

Model Code No.	Size (L x W)
023-06-01	Dia.40 x L80mm + 250 mm long handle
